

In the Claims

1. (previously amended) An automatic inflator comprising a body for receiving a dissolvable pill, said dissolvable pill including an upper surface and a lower surface, at least one of said surfaces including an undulating configuration extending parallel to a plane of said surface.
2. (original) The automatic inflator as set forth in Claim 1, wherein said undulating configuration includes peaks and troughs.
3. (original) The automatic inflator as set forth in Claim 2, wherein both said surfaces include said undulating configurations.
4. (cancelled)
5. (original) The automatic inflator as set forth in Claim 3, wherein said undulating configurations are aligned to be out of phase with each other.
6. (original) The automatic inflator as set forth in Claim 1, wherein said undulations extend radially.
7. (cancelled)
8. (cancelled)
9. (original) The automatic inflator as set forth in Claim 1, wherein said automatic inflator comprises an annular pill with a center hole.
10. (cancelled)
11. (cancelled)
12. (cancelled)
13. (cancelled)
14. (cancelled)
15. (cancelled)
16. (cancelled)
17. (cancelled)
